--	----------	-----	-----	-----	-----

<b>Critical (16)</b>	Immediate	Stop. Do not undertake the activity-critical risk, too high and unacceptable. Controls need to be implemented and the risk rating reduced to an acceptable level before the activity can recommence
<b>High (9 -12)</b>	1 week	Require immediate attention to bring the risk down to an acceptable level
<b>Medium (6 - 8)</b>	1 month	Review existing controls and consider additional ones. Regular monitoring required
<b>Low (1 – 4)</b>	3 months	Continue with the existing controls, operations requires monitoring

**Hazard:** Something that has the potential to cause harm

**Likelihood:** The likelihood of the hazard causing harm

**Risk rating is calculated by multiplying the likelihood by the severity:**

**e.g.: a likely chance of an accident resulting in a major injury = 3 x 4 = 12**

**therefore, a medium risk – within 1 month - review existing controls and consider additional ones. Regular monitoring required.**
